EDUCATION

University of Alberta | Bachelor of Science - Specialization in Computer Science   Expected Dec. 2023

SKILLS

Python, React, Java, SQLite, MySQL, C, Git, JavaScript, HTML, CSS, MongoDB

PERSONAL PROJECTS

Edmonton SafeWalk
- ❏ Worked as a group with a client to produce a functional application with React, Django, and MySQL.
- ❏ Ensured functionality using testing frameworks such as Selenium, Jest, and Django REST API.
- ❏ Deployed on Google Cloud and implemented Google Maps API.

Experimently
- ❏ Developed an android app that collects experiments, results, and chats from users using Firebase.
- ❏ Adopted an agile workflow that allowed constant communication with the customer to understand their goals.
- ❏ Used test-driven development as well as frequent updates on UML and storyboards to promote quality code.

Restaurant Order Organizer
- ❏ Devised a miniature version of a QR code ordering service for a restaurant using Python. Organizes and splits up orders for efficiency and clarity.
- ❏ Uses version control to allow for implementing new features.

EXPERIENCE

Research Volunteer - University Of Alberta | Edmonton, AB   May 2021 - Aug. 2021
- ❏ Worked with a team to meet and discuss the professor's goals on his research on periodic movement in a polygon.
- ❏ Analyzed and discussed requirements using Java and JavaFX.
- ❏ Optimized searching process by automating and minimizing manual searches.

Waiter - Tropika Malaysian Cuisine | Edmonton, AB   Sept. 2017 - Present
- ❏ Working under pressure while managing priorities and time.
- ❏ Demonstrate proficiency in multiple roles to increase efficiency and flexibility in a working environment.
- ❏ Recommending items that fit the customers needs which contribute to improving overall experience.
- ❏ Continuously looking for opportunities to discuss ideas with management to improve customer service.

Badminton Coach - B-Active Badminton Club | Edmonton, AB   July 2016 - Sept. 2018
- ❏ Created, delivered, and led activities for groups of around 30 people that focused on improving fundamentals and morale while reinforcing a risk-taking mindset.
- ❏ Comprehending and adapting strategies through experience and proactive observation at local and provincial levels.
- ❏ Develop communication skills to express and deliver advice through reinforcing fundamentals and creative examples.
- ❏ Trained as a player for 10+ years.

COURSES

CMPUT 204 - Algorithms I   Sept 2020 - Dec 2020
- ❏ An introduction towards algorithm design and analysis with an emphasis on searching, and sorting algorithms.

CMPUT 291 - Introduction to File and Database Management   Sept 2020 - Dec 2020
- ❏ Implemented MongoDB and SQLite databases alongside understanding how data is modeled, indexed, and stored.

CMPUT 301 - Introduction to Software Engineering   Jan 2021 - Apr 2021
- ❏ Applied fundamentals of software engineering by effectively using effective design techniques, development tools, and good practice while collaborating with a team to produce a product.

CMPUT 401 - Software Process and Product Management   Jan 2022 - Apr 2022
- ❏ Developed a functional product alongside the clients while applying software development/management practices.
